

irtec is an independent and renewable accreditation scheme that assesses the competence of technicians working in the commercial vehicle, trailer and passenger carrying industries.

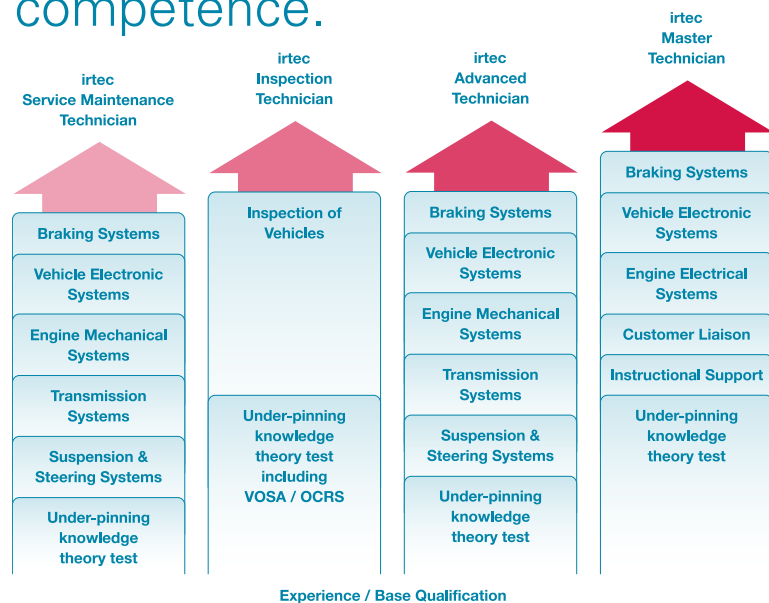

The premier technician accreditation scheme for the road transport industry, irtec provides technicians with formal recognition of their skills.

An irtec licence certifies the individual, rather than the employer, and as licences expire after 5 years, holders have proven their current competence against assured standards.

irtec was developed by IRTE (Institute of Road Transport Engineers) and is quality-assured by leading awarding body IMI Awards Ltd.

irtec licences are available at four levels, which reflect a technician's current skills and competence.

Service Maintenance Technician

Inspection Technician

Advanced Technician

Master Technician

irtec licences are available in the following vehicle classes:

- Large Commercial/Goods Vehicle (over 7.5 tonnes)
- Bus and Coach
- Trailer

The irtec assessments are constantly reviewed by a panel of industry experts, to ensure they reflect current and 'real life' industry practice.

In order to achieve an irtec licence, a technician must first carry out an hour-long theory (Under Pinning Knowledge) test, before completing a practical assessment.

The irtec process

Practical assessments are carried out at an irtec-approved centre, although they can be carried out in the workplace (under controlled conditions) by an irtec-approved assessor.

Want to find out more?

Find out more about irtec, how accreditation can help you and your business and the location of your nearest irtec assessment centre by visiting: www.irtec.org.uk

Once accredited, irtec technicians agree to abide by the irtec code of conduct, receive a licence card, certificate and are placed on the irtec technicians register at www.irtec.org.uk
